

Who Is Bactronix?

Bactronix is a microbial control company that uses nanotechnology to reduce and control bacteria, mold, fungi, viruses, and VOCs. Our products are environmentally friendly.

The exclusive Bactronizing™ Process involves a two-step specialized application. BactroKill™ is designed to physically kill bacteria, while BactroBlock™ provides long-term residual protection.

The Invisible Enemy!

Microorganisms are evolving at an alarming rate and have developed into life-threatening diseases. These “Superbugs” are rapidly becoming resistant to traditional cleaning protocols and disinfectants. Over the past decade, scientists discovered that increasing dosage and frequency of toxic chemicals have contributed to the problem, making public facilities more vulnerable to high levels of cross-contamination and dangerous biofilm.

Why Bactronize™ Your Facility?

- Seal Of Certification Promotes Public Health And Safety
- Promotes Pro-Active, Not Reactive, Antimicrobial Program
- Brings Greater Value To Your Residents And Staff
- Provides Continuous Monitoring Reports For Safety Compliance And Liability
- Provides Mold Free And Fresher Smelling Environment

Advanced Antimicrobial Technology

Quality Care Starts With The Bactronix **BATC** Program!

The Bactronizing Seal of Certification is a Symbol of Health and Safety

Bionomics

Nursing homes can harbor bacteria and allow for cross-contamination. Bionomics is the study of these environmental conditions.

Assessment

Bactronix will perform a Bionomic Assessment to evaluate the biological condition of the care facility. ATP test results are documented before and after treatment. This report provides record of reduced levels of microbial contamination.

Certification

Certification requires adherence to the protocol of the **BATC** program. Results are verified through Bionomic Assessment Reports.

Treatment

The Bactronizing Process uses an advanced electrostatic spray system to provide 100% coverage on all interior surfaces. This spray moves against gravity to coat difficult and hard to reach hidden surfaces.

BATC Program Protects: Nursing Homes • Assisted Living • Rehabilitation Centers • Primary Care • Surgery Centers • Senior Care

Dental Offices • Medical Facilities • Open-Wound Treatment Facilities • Dialysis Clinics • Eye Centers
