

## Who is Bactronix®?

Bactronix is a science based microbial control company that helps to create healthier environments using our eco-responsible products.

The exclusive Two-Step Bactronizing™ Process is applied with an advanced electrostatic delivery system. The Two-Step process will eliminate bacteria, viruses, mold and odor.

## Mold is Synonymous with Boating

Traveling on the water is exciting and fun. However, mold can present unhealthy living conditions in the interior cabin. Bactronizing is a proactive treatment process to eliminate and inhibit mold growth throughout the boating season. Recommended treatments should occur before sea-worthiness and time of dry dock storage preparation.

## Symptoms Mold Can Cause

- Headaches, Dizziness, Nausea
- Ear, Nose or Throat Irritation
- Dry/Itchy Skin (Rashes)
- Allergies/Asthma
- Fever
- Breathing/Respiratory Problems
- Equilibrium Problems
- Tremors

# Bactronix has Engineered a Process to Fight Against Mold & Mildew

## The Bactronizing Seal of Certification is a Symbol of Health and Safety

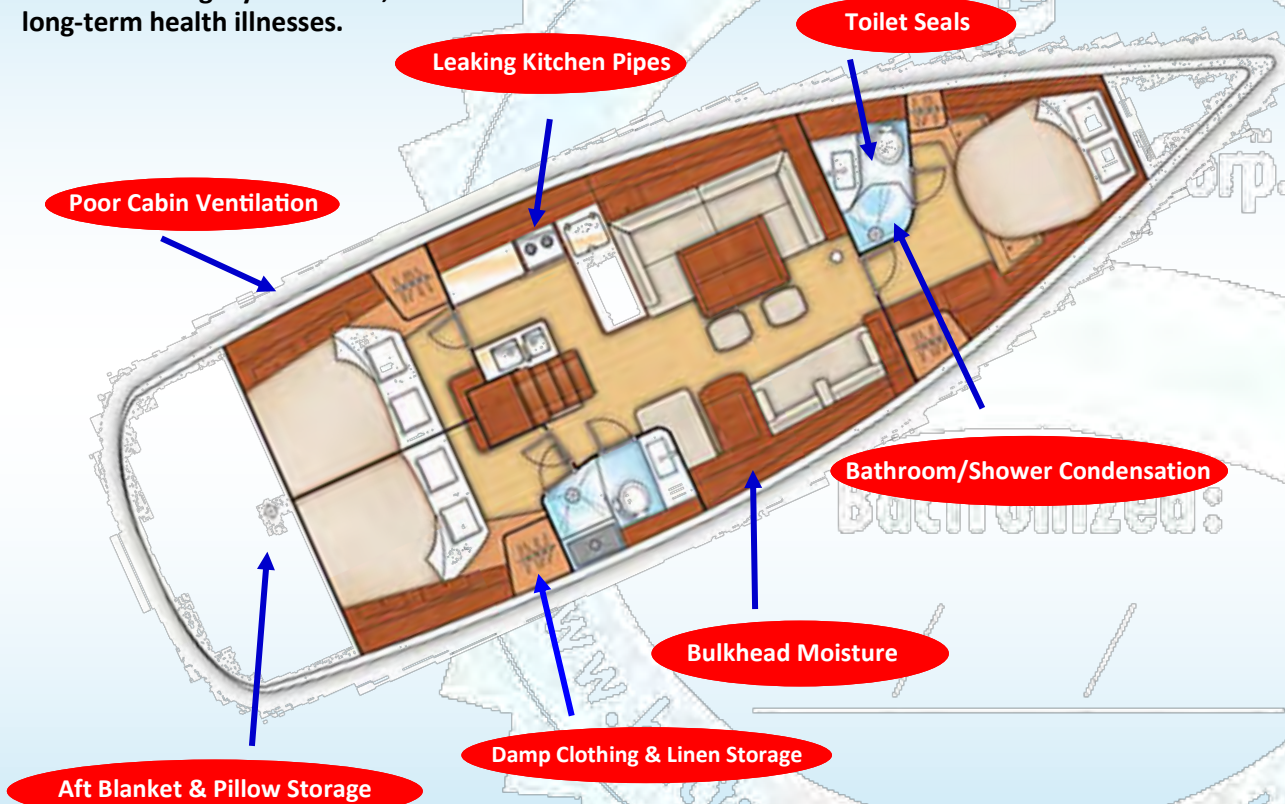

### Mold and Mold Spores

Mold and mold spores can occur in the areas where moisture and ventilation problems develop. Mold not only compromises the structural integrity of a boat, it can also cause long-term health illnesses.

*As shown in the diagram below, bacteria, mold, mildew and odor problems can develop throughout the interior cabin.*

### Odors

The Bactronizing Process eliminates odors from mold, mildew, pet, bacteria and water foul that develop over time. Our nanotechnology breaks down VOCs, providing a safer and fresher smelling boating environment.

**Bacteria and Viruses:** During cold/flu seasons and pandemics, such as SARS-CoV-2 of 2020, cross-contamination on frequently touched surfaces and contaminated HVAC systems can affect the health and safety of where we live, work and play. Our exclusive Bactronizing Process reduces and controls such bacteria and viruses to help maintain a healthier facility. With our advanced in-house testing lab, we can test environmental surfaces for Coronavirus and provide the results in one day. To maintain a good disinfection protocol, we recommended daily cleaning with BactroKill. COVID-19 is caused by coronavirus. BactroKill kills similar viruses and therefore can be used against coronavirus / SARS-CoV-2 when used in accordance with the directions for use against Canine Parvovirus (ATCC VR-953) on hard, non-porous surfaces.

We Treat Cigarette and Cigar Odors!
