## BACTRONIX AND THE AUTOMOTIVE INDUSTRY

"Bactronix Corp. is amazing. I had an adult vomit in the back of my car and the smell was terrible. I contacted a car detail company for help but he said he wouldn't be able to remove the bad smell. I called Bactronix and within 24 hours my car was treated. Incredibly professional, fast and efficient! The smell was gone immediately. I would recommend Bactronix in a heartbeat!" - Another satisfied Bactronix customer testimonial

**Vehicle Treatment includes the following:**

- Interior Cabin
- Air Intake
- Ventilation System
- Cargo Space

## MOON AREA SCHOOL DISTRICT TAKES PRO-ACTIVE STEPS FOR REDUCING AND ELIMINATING GERMS AND CONTAMINATES

Moon Area School District takes pro-active steps for reducing and eliminating germs and contaminants in the schools. To protect students, teachers, parents, administrators and custodians, the District is implementing a microbial control program that will enable them to react quickly to issues that cause illnesses and absenteeism.

Bactronix Corp., a local Moon based company, is educating the custodial staff on the use of a BactroKart which will enable them to perform the applications that the Bactronix technicians usually deliver.

This effort places the Moon Area School District in a leadership position to combat those "invisible enemies" that make children and teachers ill. Improved attendance is the ultimate goal of this program, as well as keeping the environmental facilities safe for the people that work and play in them.

## THE THREAT OF ANTIBIOTIC RESISTANCE

- 63% of infectious disease doctors have treated patients with infections that did not respond to any antibiotics
- Direct health care cost incurred by patients suffering from antibiotic resistant infections is exceeding the level of 20 billion dollars each year
- 2 million Americans acquire serious infections caused by antibiotic resistant bacteria each year
- 23,000 people die each year as a direct result of these infections

These numbers came directly from CDC reports and the main question is: What can we do about this? The answer: Join forces with Bactronix! Be proactive through intense testing and treat with non-toxic products, through a Nanotechnology process. The process is called Bactronizing and the products used for this process are BactroKill and BactroBlock.

## BACTRONIX OPENS ANOTHER FRANCHISE IN SOUTH CAROLINA

Bactronix opens the next franchise in South Carolina, called Bactronix of the Grand Strand. The franchise will cover the territory from Myrtle Beach to Hilton head.

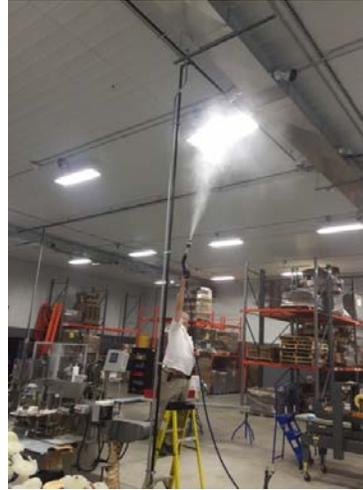

The owners, Greg & Daria Busang are very excited about the opportunity they are bringing to this market area. The Bactronix Franchise Agreement was signed on August 29th and they expect to be fully operational by October 1st. South Carolina is a great market area, considering that the high levels of humidity are perfect breeding grounds for mold, algae and bacteria.

Bactronix of the Grand Strand, S.C. will focus on testing and treatment of Residential Homes, Pre-Owned Automotive, Emergency Service Vehicles, Gyms, Doctor Practices, Schools, Boats, Ships and Care Facilities.

Several other franchises are pending, including Bactronix of Nashville, TN. The opening of this franchise is expected within the next 30 days!

## BACTRONIX PROVIDES SOLUTION TO COMPLICATED MOLD ISSUE

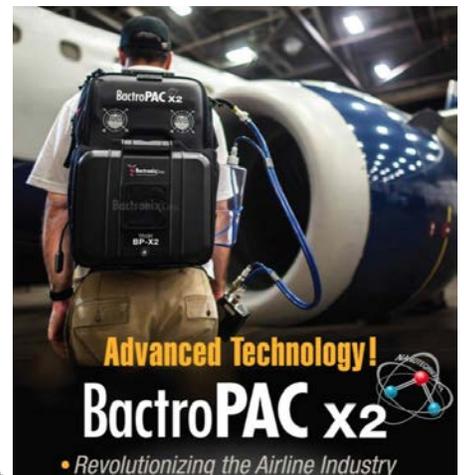

A Manufacturing Company who makes products utilizing the process of boiling, which produces steam, is at risk for contaminating their finished products with mold, mildew, algae and fungi. Even in a metal building, the collection of steam (vapor-moisture) on surfaces can present a problem with mold. The surfaces that collect the moisture cannot always be dried; therefore, a process to rectify the situation needs to be employed. Bactronix provides the perfect solution

because we can guarantee 100 % coverage of an anti-microbial coating, using our electrostatic equipment and effective products. Bactronix has contracted a regularly scheduled appointment to make sure that mold or any other invisible organisms do not get into their signature products. Their walls, floors, ceilings, and air handlers as well as any other item in the shop get Bactronix Two-Step Bactronizing Process which keeps their products safe from contamination. Pre and Post Testing is also part of the process.

Record Keeping and Trend Analysis assist in the effort of keeping the building from being overrun with mold and harmful contaminants. This process has been in place for over 2 years and the testing results have proven to deliver a high level of satisfaction.

## BACTRONIX SEALS DEAL WITH MAJOR AIRLINE COMPANY

Through years of research and development in conjunction with the world's largest airline company, Bactronix has developed a battery operated electrostatic spray system to treat the ductwork, as well as, the entire interior of the plane with a non-toxic, hospital grade disinfectant. The product and the equipment have been tested under the most stringent guidelines of the airline industry and proven to be highly effective against

mold, bacteria and odors. This exclusive unit is called the BactroPAC and is being implemented worldwide.
