Is Your Salon Compliant?

In recent years, bacteria has become immune to the typical cleaning protocol of harmful chemicals. This is the leading cause of the spreading of bacterial infections in the Beauty

industry today. The chemicals are also hazardous for staff and clients to work with daily. Bactronix supports the beauty industry by providing a hospital grade, EPA registered disinfectant that is non-toxic—C3 Cosmetology Complete Care. Its advanced Nano-technology is safe for people, plants, pets and the environment. C3 is a new way to provide long lasting disinfection for the individual or professional beauty consultant. It is the standard for providing health and safety to the cosmetology industry. Become part of this non-toxic earth friendly revolution of disinfection.

Take your health and safety to the next level:

Bactronix Corp was established four years ago, targeting microbial control in hospitals, schools, care facilities, emergency medical services, gyms, corporate facilities and beauty facilities. Research has shown bacteria can easily harbor in various areas of the beauty industry. Unsanitary practices can result in the transfer of dangerous pathogens to clients and staff, such as fungal infections, warts, C. diff, staph, and MRSA. The solution: daily use of C3 and the Bactronizing treatment of your facility with the non-toxic two-step process that greatly reduces these pathogens.

Benefits of Bactronizing

- Seal of Certification Promotes Public Health And Safety as well as a Pro-Active, Not Reactive, Anti-microbial Program
- Brings Greater Value To Your Clients and Staff in the Beauty Industry's Culture of Health and Wellness
- Provides Continuous Monitoring Reports For Safety Compliance and Liability Risk
- Feature Safer and Healthier Operations
- Eliminates Harmful VOC's such as Ammonia & Formaldehyde as found in Chemical Beauty Services and products
- Keeps your business compliant with House Resoulution 358 which strongly suggests public facilities should include testing for bacteria, mold, mildew, fungi, algae, viruses and volatile organic compounds (VOCs) twice a year, and should allow and encourage the use of nanotechnology and other non-toxic means that are proven to be effective for killing microbes; and are not harmful to people, places, animals and the environment.

Top facilities in the Beauty Industry that are Suffering from Cross Contamination Today:

- Salons
- Spas
- Barber shops
- Tanning salons
- Nail salons

Stylist Testimonials

Laura Kalinosky reviewed C3 - Cosmetology Complete Care— ★★★★★

I have a challenge with asthma and this product is a life saver! Not only is it non toxic, it also has so many uses. I sanitize all my brushes and tools without the harsh chemicals, and it takes seconds. The price is right and there is no odor or messy liquids. I never travel without this, fits in my purse and is TSA safe.

Brooke Candiello reviewed C3 - Cosmetology Complete Care— ★★★★★

C3 is an amazing product. It does not have any harsh chemicals or strong chemical odors that are extremely harmful if breathed in. I love the feeling of knowing that there are NO BACTERIA left behind after using C3! Thank you Bactronix!
